Dear Parents / Carers

Measles, Chicken Pox and Shingles

Please may we ask for your co-operation over an important health related issue.

One of our current students is receiving medical treatment for cancer which puts them at significant health risk if they are exposed to measles, chickenpox or shingles.

We would be grateful if you could let us know immediately if either your child is suspected of having measles, chickenpox or shingles **or** if there is a case of measles, chickenpox or shingles within your household. The student concerned would need medical treatment, inclusive of a potential injection, within a short timeframe if they came into contact with any of these conditions.

Thank you for your support in this matter.

Yours sincerely

Mr R Bernard
Headmaster
