Task

On you own.

Think about the two or three platforms that you use most frequently or know most about.

- Make a list of the **affordances** of each one – that means the things that you can do with it that you can't do in a spoken conversation? (eg Twitter – retweet, favourite... Facebook – Like, Friend...)
- Now make a list of the **limitations** of each one – what does a spoken conversation have that a digital conversation doesn't (you can't see the other person, you can't hear tone of voice...)

In a group of 4

Discuss

Which are the most useful affordances of digital communication platforms? Pick out a top 3.

Write them down.

Which are the most serious limitations?

Pick out a top 3.

Write them down.

Be prepared to explain WHY you think that

Extension Task:

You have been given the task of designing a new social network platform.

- What affordances would it have?
- How would you overcome the most serious limitations of other platforms?
- What would you call it?
